Forecast for Thursday 07 Sep 2023

Weather: Any early mist, fog or low cloud will clear quickly through the morning leaving a dry and mostly sunny day but some high cloud may make the sunshine hazy at times. A chance of showers moving northwards through the morning, with some frequent flashes of lightning possible, but gradually easing by the middle of the day. Patchy mist and fog likely to reform in the valleys overnight.

Chance of cloud-free hill tops above 600m: 95% or more.

Low cloud and visibility: Patchy fog in valleys may briefly cover slopes and tops as it lifts and clears during the morning, and will give some locally very poor visibility to start. Otherwise generally good visibilities though once again fairly hazy.
